

# STAS plasterrail for the forward thinker

Practically invisible, but by no means less functional. STAS plasterrail is the only picture hanging system in our range which can be fully integrated into a new stucco wall. So it's ideal for new-build projects and renovations.

The steel rail is fixed to the bare wall. After plastering, only a small opening of approximately 4 mm is visible in the stucco. Cords specially designed for the plasterrail can then be hooked in through this opening.

To prevent any plaster from entering the rail during plaster work, a cord must be placed in the rail opening before the work begins.

## Features

Dimensions	10.5 x 45 mm
Length	12 mm
Colour	250 cm
Material	galvanised steel
Installation	wall mountable, integrated in stucco
Weight capacity	20 kg/m
Warranty	5 years
